

MDI Wins Top Product Awards at ISC West 2006

Security Industry Association Announces MDI's ONE™ Technology as the Top Integrated System

Security Industry Association (SIA) Award

The Security Industry Association announced on Thursday, April 6, 2006, that MDI has been awarded the 2006 Product Achievement Award for Integrated Systems for its C2OS™ Open Architecture Command and Control Operating System.

SIA's panel of judges chose the ONE Platform over all other entrants in the 2006 New Products Showcase program held in Las Vegas at ISC West.

Asset Protection Executive (APE) Award

In a separate announcement, Asset Protection Executive Magazine awarded MDI the 2006 Technology Innovation Award for its ONE Platform in combination with the ASL technology.

APE found the ASL products to be "cost efficient and extremely flexible" and they were proven to be able to "fill or support the most demanding security requirements without replacing hardware or software".

MDI also competed against a host of leading manufacturers for the 2006 Technology Innovation Award. For a copy of the Asset Protection Executive Magazine article and product evaluation, please visit:

MDI at the ISC West

With Tom Ridge as keynote speaker, covering critical homeland security strategies, this was the largest ISC West event in history, serving over 23,000 attending security professionals and over 1,000 exhibiting companies.

Please follow the link below for a multi-media presentation of MDI at the ISC West Show.

ONE Platform

"ONE is the premier technology in the security industry and these prestigious awards validate that," stated Tim Rohrbach, Vice President and Chief Information Officer for MDI. "We spoke to many of the Judges, publishers and industry professionals after the awards ceremony at ISC West, and we learned that MDI is the only company with the technology to unify security point products, systems and subsystems into a common management platform. Plus, we have over 25 years of experience in providing network security systems for the Federal Government. Because of what we have learned over those 25 years, we have become the standard for high-security enterprise solutions. When you combine our years of experience with the Federal Government and our open architecture command and control operating system, the ONE C2OS has no competitors".

Future Demand for Integrated Security Systems

Over the past several years, there has been a major shift towards integrating access control systems into the total security system. In its 2005 Security Industry Annual Report, Lehman Brothers states that 50 percent of all access control systems are being installed as part of an integrated security system, which are projected to provide 10 percent industry growth levels for the next two years, fueled by upgrades and homeland security initiatives. Lehman Brothers believes the integrated access control market will be \$5 billion in 2006.

"MDI is far ahead of our competition in providing a unified security platform," said Jim Lowder, Vice President of Engineering and Chief Technology Officer. "Today's acceptance of IP and network-based solutions in our industry has finally brought the market and the capabilities of MDI together. ONE is the perfect solution for organizations that are looking to get the most from their integration projects. Last week, experts from the industry's most highly respected organization (SIA) officially recognized that. I am certain that the thousands of security professionals that visited our booth during ISC West for a demonstration recognized that as well," he added.

About the Security Industry Association

Formed in 1969, the Security Industry Association (SIA) provides its members with a full-service, international trade association promoting growth, expansion, and professionalism within the security industry by providing education, research, technical standards, representation, and defense of member's interests. SIA has over 300 member companies representing manufacturers, distributors, service providers, integrators and others. SIA members are involved in several market segments such as, CCTV, access control, biometrics, computer security, fire/burglar alarms, home automation, just to name a few. Members work together to address issues facing the industry and develop programs to enhance the environment in which they sell products and services. SIA is the sole sponsor of the International Security Conference and Exhibitions (ISC EXPOs) and can be located on the Internet at www.siaonline.org.

About the New Product Showcase

SIA's New Product Showcase is an internationally recognized promotion and awards program, which is held each year at the International Security Conference (ISC) EXPO West. Designers and manufacturers of electronic security products, peripherals and services are invited to submit their newest products and services for this industry-wide, international competition.
