

Corporate Capabilities

UNIFIED SECURITY SYSTEMS

Since 1979, Monitor Dynamics has been a leading provider of unified security systems management software and hardware solutions for government and commercial organizations across the globe. Monitor Dynamics delivers unified access control, intrusion detection, video management and identity management solutions, providing the highest-level of security, reducing risk and protecting critical assets for global customers. Our open architecture platform allows organizations to manage their security systems, video surveillance and facility operation equipment from a single, centralized command and control desktop application. Monitor Dynamics currently maintains several thousand integrated security installations worldwide supporting various industry segments. A cross section of customers include: **US Department of Justice; Los Angeles Air Force Base; US Bureau of Engraving and Printing; San Diego Unified School District; National Reconnaissance Organization; Transportation Security Administration (TSA); Federal Bureau of Investigations (FBI); Smithsonian Institute; Massachusetts Institute of Technology (MIT); NASA Jet Propulsion Labs; United States Marines (Marine Bases, United States); United States Army (Army-wide Integrated Commercial Intrusion Detection System); San Francisco Airport; Arizona Supreme Court; State of Arizona Administration Offices; Bank of America (MBNA locations globally); US Navy Europe (all bases); Atlantic Casino and Resort (Bahamas); California Department of Transportation; Department of Veterans Affairs, Dayton; Pepsi; Smith and Wesson; American Express; John Deere USA; Wake North South Carolina (all County Offices and Correctional Facilities); Cox Communications; Daimler Chrysler Trucks North America; US Food and Drug Administration; Department of Agriculture; Ronald Reagan Building and International Trade Center (Washington, DC); Hanscom Air Force Base; Raytheon; General Dynamics; Bank of China; Sigma Aldrich Chemical Company (Global).**

Unified Security Platform

SAFEnet and PointGuard Xtreme deliver a centralized unified security software solution for both enterprise and small business installations. Individual applications are available as standalone modules or deployed as a customized unified end-to-end security solution. Monitor Dynamics' SAFEnet software solution seamlessly unifies all the critical components necessary to manage and monitor multi-site facilities including access control, intrusion detection, identity management and video surveillance. The SAFEnet platform is built on a robust open architecture that meets the performance demands of mission critical infrastructure applications running across multiple systems and locations.

Advanced Security Systems Engineering

All of the products manufactured by Monitor Dynamics are designed by engineers with years of security domain knowledge. Monitor Dynamics' ALERT (Advanced Logic Engineering and Research) team understands the functional requirements of today's security system, alarm management, access control, video surveillance and identity management requirements of both corporate and government system users.

Monitor Dynamics Products:

Unified Security Management Software

- SAFEnet - Unified Security Management Software for access control, intrusion detection, video surveillance and identity management is designed for large-scale enterprise installations and multi-site operations
- PointGuard Xtreme - Delivers powerful access control and alarm management for Small and Medium Sized organizations with 2-to-64 doors. PointGuard Xtreme utilizes IP - based door control hardware

Intelligent Access Control Hardware

- IDC (Intelligent Digital Control) Hardware delivers unified access control and intrusion detection across the enterprise
- PB 2000 Hardware designed for current legacy system upgrades to latest SAFEnet version

Video Surveillance

- VIEWpoint Hybrid Network Digital Video Recorder: combines IP and analog capabilities for unified control and video pop-up on alarm by the SAFEnet platform

End-to-End Unified Solutions

Monitor Dynamics focuses on delivering unified access and intrusion solutions that exceed our customers' security requirements from project inception through final completion. Monitor Dynamics' comprehensive solution includes: software, hardware, training, technical support and direct on-site engineering support. The Monitor Dynamics' Certified Dealer Network is skilled at designing, installing and maintaining SAFEnet systems to provide maximum system value - and immediate time-to-benefit.

Federated Identity Credential & Access Management (FICAM)

Monitor Dynamics' SAFEnet Platform satisfies all compliance requirements with Homeland Security Presidential Directive 12 (HSPD-12) and Federal Information Processing Standards Publication 201 (FIPS-201) mandates. SAFEnet is the government PACS of choice for compliance with FIPS-201 and OMB 11-11, and is capable of reading PIV, PIV-I, PIV-C, TWIC and CAC.

Company Highlights & Milestones

- Over 30 years of successful high-security systems experience
- Currently support over 10 million access points across the globe for thousands of installations
- Software & hardware product solutions are time-proven in many of the worlds largest and most highly-classified government systems
- Historically achieved more UL listings than any other competing system on the market including UL-294, UL-864, UL-1076 & UL-1981
- Recipient of numerous National Product Innovation Awards.
- First PACS to read PIV-I in a DOD operating environment
- First PACS to pass CertiPath Trusted PACS certification testing

Training & Certification

Monitor Dynamics offers hands-on instruction for their security products. Monitor Dynamics' technical training and certification programs provide extensive instruction on the configuration of each component and the proper procedures for effective and efficient site installations. Security personnel who attend Monitor Dynamics' training courses become proficient in operating and administrating Monitor Dynamics enterprise security systems.

Technical Support

Monitor Dynamics' expert Trusted Support team offers multiple levels of tiered support services geared at providing cost effective services that address each unique customer need. The Trusted Support team is equipped with the latest customer support management technology ensuring all e-mails and calls are directed and processed as promptly and professionally as possible.

Quality Customer Service

Monitor Dynamics is dedicated to providing the highest level of response and support for customer orders, repairs, inventory availability and advance replacement services. With Monitor Dynamics, all of your security products are ordered, processed and shipped from one central location.

Purchasing Information

Monitor Dynamics offers a wide variety of purchasing options for government, institutional and commercial organizations across the globe. For immediate information on the best option to fit your specific purchasing needs, please contact our Account Management Team at: info@mondyn.com or call (210) 477-5400.
